

Service Advisory #07

Date: November 2022

PLATFORM MOUNTING HARDWARE INSPECTION

Applies to: All Skyjack DC Electric Scissor Lifts and Skyjack 68/70/71xxRT scissor lifts

Warning!

A failure to perform the required inspection and maintenance on the structure of a Mobile Elevating Work Platform (MEWP) may result in serious injury or death.

Following an incident where a platform detached from a Skyjack Scissor after being removed and improperly re-attached during maintenance, Skyjack is providing additional detail concerning the inspection and maintenance of the platform mounting hardware within the applicable Skyjack Service Manuals.

As outlined in the applicable Skyjack Service Manuals and various applicable regulations, this inspection must be completed as part of the required frequent/periodic/6-month/annual inspections. If these inspections have not been performed in accordance with the current applicable Skyjack Service manual, an inspection by a qualified person should be performed immediately, and regular inspections should be commenced thereafter.

Additional details for the inspection of the platform mounting hardware to ensure a MEWP continues to function safely are included in the current Service Manual applicable for your MEWP's serial number, available at www.skyjack.com. This service advisory is also available on our website at: www.skyjack.com/service-advisories.

You must;

- Perform the platform assembly inspection as specified in the current Service Manual, including inspection of the platform mounting hardware and connection of the platform to the scissor stack.
- Refer to the procedure in the current Service Manual when maintaining the platform mounting hardware.

If you require further information regarding this supplement, please contact Skyjack Service at 1-800-275-9522 or 44 1691 676 235. You may e-mail questions to service@skyjack.com.

Ownership of Machines:

Skyjack requires that you promptly notify us of a new owner's contact information if you have sold or transferred any machine. Please forward this service advisory to the new machine owner and contact service@skyjack.com with the updated owner contact information.
