MIGHTY MICROS

MEAN BUSINESS

SJ3213/19 micros

PLATFORM

- Low stowed height; fits through standard doorway with solid rails. Standard full height gate
- Large platform deck rated for 2 persons, 500 lb capacity
- Multiple lanyard attachment points
- Standard wind rating up to 12' on SJ3213 micro, and 16' on SJ3219 micro

BASE

- Maintenance-free brushless AC Electric Drive motors offers more run-time, more sustainability
- All base controls located at rear of machine for easy access
- Fixed pothole systems reduces maintenance and allows for 25° break-over angle
- Swingout battery and hydraulic trays for easy access to components
- Single point emergency lowering

WHY SKYJACK?

- ✓ Equal or lower gross vehicle weight and floor loads when compared to other micros
- ✓ Platform & extension deck design provides the largest platform area in micro class
- ✓ Digital diagnostic display in simple language with no plug in calibration for day-to-day troubleshooting
- ✓ Steel front wheel motor guards, prevents protection for parts exposed on other micros
- ✓ Modular design of optional XStep allows assembly in minutes, stowed during driving or moved between machines
- ✓ Simple two-piece optional ECOTRAY, capable of containing 100% of machine's hydraulic oil volume with no large underbody pads to worry about

SCISSOR STACK

- Open-ended design with reinforced outer levels for stability and reduced overall weight
- Integrated entrance ladder to reduce overall length

SKYJACK
simply reliable

AC ELECTRIC DRIVE MICRO SCISSOR LIFTS

Our new micro scissor range represents a significant new presence in the low-level access arena. Ideal for easy accessibility into tight spaces, it has a quiet and swift electric drive.

The SJ3213 micro and SJ3219 micro combines low cost of ownership with our renowned product support.

SJ3213 / 19 micro Commonality table			
Location	Component	VM	E-Drive

Platform	Control Box		✓

* Same charger but different terminals due to battery

COMPACT AND LIGHTWEIGHT

Designed to fit most elevators and to work in environments where space is at a premium while at the same time providing a substantial work area.

- Passes through a standard door rails up
- Up-and-over capability with 20" extension deck (220 lb capacity)
- Low floor loading
- Lifting lugs and tie downs located on all 4 corners
- Forklift pockets

ONBOARD DIAGNOSTICS SCREEN

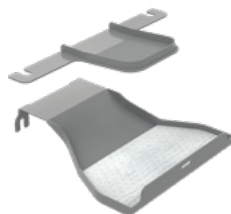

Provides real-time data, easy to understand machine faults, written in plain and simple language, without the need to open service trays.

No plug-in calibration is necessary for day-to-day troubleshooting, including load sensing information.

ACCESSORYZERS™

- ECOTRAY leak containment system[‡]
- Secondary Guarding Lift Enable (SGLE)
- Perimeter lights
- XStep

CONTROL BOX

- Removable, high strength and impact resistant composite upper control box with integrated shroud; common across all E-Drive models
- Low battery indicator light on control box

[‡] DC electric scissor ECOTRAY configurations vary by model

* Options: Standard lead times may be increased when optional equipment is added, consult factory. Capacities and machine weights may differ when options are added.
